

2019 "SPECIAL PURCHASE"

If you were fortunate to purchase bees from our special purchase offer

last year, you know the benefits of this improved honey bee stock. It was reported, the packages arrived disease and pest free.

The packages built healthy colonies, with calm, gentle, and productive bees.

A limited number of packaged bees are being offered again this year. The northern California producer will again be providing northern hardy mated queens from a selected hygienic honey bee stock.

The stock will arrive in early May to northern Lake County, IL, depending on the production conditions. Three pound packages are offered at \$154.00 each. There is no added shipping cage deposit required.

Bees of this gene pool have been observed physically removing the Varroa mite, thus reducing the mite population, and the multiple problems that come with it. Our hope is to see a reduction in the need to treat our colonies for mites, resulting in improved honeybee health and productivity. We believe, with proper stewardship, these special packages will contribute to any northern survivor stock.

We are offering a limited supply of 3# packages from select stock

- The limited availability will sell out.
- Your order with the "pre-payment in full" will be accepted in the sequence of receiving the mail.
- A receipt will be sent to acknowledge the pre-payment and order.
